Cosmetics Testing Symposium

2025 POST-SHOW REPORT

skinobs

INTRODUCTION

01

On 14 & 15 May 2025, professionals from across the dermocosmetics sector gathered in Lyon for the fourth edition of Cosmetotest, the international symposium dedicated to the science in preclinical and clinical testing. With over **200 participants** from more than **20 countries**, the symposium once again offered a focused experience for exploring the scientific and technical challenges shaping the evaluation of cosmetic products.

This year's program stood out for its in-depth discussions on **microbiome**, **pigmentation**, **exposome** and **vascularization**, highlighting the importance of scientific rigour, innovation, and cross-sector expertise. Cosmetotest is valued for its ability to foster meaningful exchange between researchers, brands, CROs, and instrumentation providers, bringing together multiple perspectives to enrich the development and validation of cosmetic products.
